

Echelon[®]
CABINETRY

Our **Commitment**
To Sustainability

Sustainability has emerged as an important component in our everyday lives, directly shaping our daily activities and the products we purchase.

As a leading manufacturer of high-quality wood cabinets, Echelon Cabinetry recognizes the importance of protecting the environment and using resources responsibly.

All our products are compliant with CARB ATCM 93120 Phase II (CARB II) and Toxic Substances Control Act Title VI (TSCA Title VI), and we are proud to carry the KCMA's Environmental Stewardship Program (ESP) certification.

The CARB II and TSCA Title VI rules require panel manufacturers, distributors, importers, fabricators, and retailers of the covered composite wood products, including cabinet manufacturers, to only use composite wood products that do not exceed specified formaldehyde emissions levels (≤ 0.09 ppm for particleboard; ≤ 0.11 for MDF).

Through the ESP, the KCMA encourages practices that benefit the environment and communities served by cabinet manufacturers. The ESP certification program holds the cabinetry industry to high standards for their products, forest sustainability, and manufacturing processes. As part of the annual certification process, Echelon Cabinetry goes through a yearly audit of materials, suppliers, and manufacturing processes to ensure CARB II and TSCA Title VI compliance.

Echelon Cabinetry is committed to systematically reducing our environmental footprint and providing environmentally conscious products to our customers as well.

In addition to meeting CARB II / TSCA Title VI requirements, Echelon Cabinetry may help your building or project achieve LEED certification.

LEED Credit	Premier	AllWood	Pinnacle
